SUMMARY

Back-End Developer with a strong interest in system design, performance optimization, and clean architecture. Experienced in developing backend services, managing databases, and implementing efficient development workflows since 2025. Always exploring better ways to design, build, and ship high-quality backend systems.

EXPERIENCE

Indie Software Engineer 01/2025 - Present

- Developed a POS system using Golang and Vue.js for sales and transaction management (*Client project*)
- Built a news web platform for NPS (*Confidential Client, in development*)

Software Developer Intern 09/2025 - Present
Nayati Indonesia ↗

- Developed an IT Asset Audit & Monitoring system using Golang to improve asset tracking and reporting
- Optimized a Laravel 8 (PHP 7.4) web application CRM, improving performance and reducing load time
- Built an ERP system for PT Inox Metal Asia (subsidiary of Nayati Indonesia) to support business operations
- Implemented CI/CD pipelines using GitLab and Docker for automated build and deployment

Backend Developer & Coding Mentor 02/2025 - 07/2025
Bengkel Koding @Udinus ↗

- Gathered and analyzed requirements for web application development
- Built a Web Internship Management System for Computer Science students at Dian Nuswantoro Univeristy
- Mentored a 2-credit (2 SKS) Web Developer class alongside system development

Backend Developer Intern 01/2025 - 02/2025
Phicos Group ↗

- Learned and applied backend development using PHP and FastAPI
- Developed basic API features and practiced backend fundamentals

EDUCATION

Computer Science 09/2022 - 02/2026
Dian Nuswantoro University - Bachelor of Computer Science

SKILLS

Golang	Intermediate	SQL	Intermediate
Docker & CI/CD (Gitlab)	Intermediate	Vue	Basic
Git	Basic	PHP (Laravel)	Intermediate
